ABOUT **AKRAPOVIČ**

Akrapovič is a manufacturer of premium exhaust systems for motorcycles and performance cars. It is renowned around the globe as an innovative high-tech company that uses advanced technology and high-quality materials in exhaust-system design.

Founded in Slovenia in 1991 by former motorcycle racer Igor Akrapovič, the brand has grown to international prominence. Through racing, which has led to winning major world championship titles and setting the highest design standards – leading to Akrapovič winning Red Dot: Product Design awards – Akrapovič is consistently at the forefront of exhaust technology.

The technical ability and support Akrapovič provides to racing teams to give them the competitive edge follows the same heritage and knowhow that is transferred into road and off-road systems. Increased performance, more power, and greater durability are all directly related to the research, development, and testing that every Akrapovič exhaust is subjected to in the racing arena, giving it a pedigree that few others can match.

The company operates from state-of-the-art factories in Slovenia, where facilities include an on-site titanium foundry, metallurgical laboratory, and hi-tech production machinery. Akrapovič distributes its products in more than 80 countries.

RACE **PROVEN**

OFFICIAL PARTNER: BMW M MOTORSPORT

Akrapovič and BMW M Motorsport became partners in the 2012 Deutsche Tourenwagen Masters (DTM) championship, the year BMW M Motorsport returned to the series. This has been a fruitful partnership with great success from the start, with Bruno Spengler winning the first DTM title for the team in its inaugural season. This was followed by two more in 2014 and 2016, won by Akrapovič brand ambassador Marco Wittmann, who became the youngest-ever two-time DTM champion when he powered his Akrapovičequipped BMW M4 DTM to the 2016 title.

Akrapovič provides the latest technological knowhow in high-performance exhaust systems and lightweight technology to give BMW M Motorsport the best advantage on the track. In recent years Akrapovič has extended its official partnership with BMW M Motorsport to the iconic 24-hour race at Germany's famous Nürburgring circuit and the GT World Challenge Europe, where BMW competes with BMW M4 GT3 EVO cars, and to the FIA World Endurance Championship and IMSA WeatherTech SportsCar Championship, where BMW M Hybrid V8 cars are racing for success, fully equipped with Akrapovič exhaust systems. Working together with BMW M Motorsport's renowned racing department, Akrapovič creates unique exhaust systems that are developed to perfectly extract the power of the BMW M4 GT3 EVO and BMW M Hybrid V8.

There is no better proving ground for a high-performance exhaust system than the most demanding racetracks around the world.

"Akrapovič is a world-renowned and extremely professional company that gets everyone's heart racing. The products are unrivalled both for street use and in motorsports! The increased performance, weight savings, and of course the sound are just incredible. Since 2014 I've been the first Akrapovič brand ambassador, and I'm very proud to be able to promote and present a brand like this. I'm looking forward to staying with the company for many years to come – and to the many successes, victories, and winning championships ahead!"

Marco Wittmann, 2014 & 2016 DTM Drivers' Champion BMW M Motorsport works driver
