

The image features a performance graph on a black background. Two lines are plotted: a red line representing the E-PO/T/5 header set and a grey line representing the baseline. The red line shows a significant increase in power and torque starting around 3000 rpm, peaking at 3950 rpm for power and 3900 rpm for torque. The grey line shows a more gradual increase. The text is overlaid on the graph, providing specific performance gains and weight savings.
